EXPERIENCE

Payality, Los Osos, CA — *Software Engineer*

November 2019 - PRESENT

ENTERPRISE PROJECTS

PayalityEZ — *Web App for gathering and manipulating payroll data*

- Using a MERN Stack (MongoDB, Express, React, Node) created the project start to finish and deployed it via Azure.
- Set Up a Mongo database on the cloud
- Implemented a RESTful API for the mongo database using Node.js
- Using React, Redux, and SASS I wrote all of the front end code to create a responsive mobile first app.
- Ensured application security and managed multiple API interactions.

Payality Broker Portal— *Web App for our Broker partners to communicate with us effectively*

- Wrote a full front end application using React/Redux
- Integrated with a production API to store data
- Created a quote calculation Engine using Node.js
- Implemented secure authorization

EDUCATION

University of Illinois Springfield, Springfield, Illinois — Bachelor of *Computer Science*

Aug 2020 - March 2022

California PolyTechnic University, San Luis Obispo, CA— *Biology*

September 2013 - March 2018

LANGUAGES

Javascript
